The 2010 Franklin County Local Mitigation Strategy was prepared by the Franklin County LMS Task Force with support from the Disaster Resistant Communities Group.

## EXECUTIVE SUMMARY

Franklin County is threatened by a number of different types of natural, technological, and societal or man-made hazards. These hazards endanger the health and safety of the population of the county, jeopardize its economic vitality, and imperil the quality of its environment. Because of the importance of avoiding or minimizing the vulnerabilities to these hazards, the public and private sector interests of Apalachicola, Carrabelle, and Franklin County have joined together to create a task force to undertake a comprehensive planning process that has culminated in the publication of this document: “Franklin County Local Mitigation Strategy (LMS).”

This task force, entitled the Franklin County LMS Task Force, has conducted detailed studies to identify the hazards threatening the jurisdictions of Apalachicola, Carrabelle, and unincorporated Franklin County and to estimate the relative risks posed to the community by those hazards. This information has been used by the Task Force to assess the vulnerabilities of the facilities and jurisdictions of the county to the impacts of future disasters involving those hazards. With these identified, the Task Force has worked to identify proposed projects and programs that will avoid or minimize these vulnerabilities to make the communities of the county much more resistant to the impacts of future disasters.

These proposed projects and programs aimed at reducing the impacts of future disasters are termed “mitigation initiatives” in this document. Mitigation initiatives have been developed and will continue to be proposed by the Task Force for implementation whenever the resources to do so become available. It is important to note that this mitigation initiative list is not finalized. The list of mitigation initiatives will and should evolve as projects are undertaken and completed, as future disasters affect the county and new needs are identified, and as local priorities change. As the mitigation initiatives identified in this plan are implemented, step-by-step, the county and its municipalities will become a more “disaster resistant” community.

This document details the work of the Franklin County LMS Task Force to develop and maintain the planning organization, to undertake the needed technical analyses, and to coordinate the mitigation initiatives that have been proposed by the participating jurisdictions and organizations.

The Federal Emergency Management Agency (FEMA) and DCA require that this document be adopted by the governing bodies of Apalachicola, Carrabelle, and Franklin County. Adoption of the LMS by the City and County Commissions will not have any legal effect on the Comprehensive Plan or any other legally binding documents. However, adoption of the LMS will give the county and its jurisdictions priority with respect to funding for disaster recovery and hazard mitigation from state and federal sources. Through publication of this local mitigation plan, the Task Force continues to solicit the involvement of the entire community to make the people, neighborhoods,

businesses, and institutions of Franklin County safer from the impacts of future disasters.

## Table of Contents

Section	Topic	Page
<b>Section 1</b>	<b>Introduction and Purpose</b> Hazard Mitigation Overview The Franklin County Context	<b>1</b>
<b>Section 2</b>	<b>The Planning Process</b> The Task Force Organizational Structure Summary of the Planning Process The Task Force’s Operating Procedures Current Status of Participation in the Task Force	<b>5</b>
<b>Section 3</b>	<b>Jurisdiction Profiles</b> Franklin County Apalachicola Carrabelle	<b>14</b>
<b>Section 4</b>	<b>Hazards and Vulnerabilities</b> Community Assets Recent Disaster Events Hazard Identification and Vulnerability Assessment Critical Facilities Inventory Repetitive Loss Properties	<b>25</b>
<b>Section 5</b>	<b>Mitigation Goals and Policies</b> Goals for the Mitigation Plan Organizations with Mitigation Functions Plans, Policies, and Programs Examination	<b>132</b>
<b>Section 6</b>	<b>Compilation of Mitigation Initiatives</b> Proposed Mitigation Initiatives Ranked By Priority Score Mitigation Initiatives Priority Score Process Completed Mitigation Initiatives Mitigation for New Buildings and Infrastructure The Priority for Initiative Implementation Effectiveness of Mitigation Initiatives	<b>150</b>
<b>Section 7</b>	<b>Plan Implementation, Maintenance and Updating</b>	<b>177</b>

Planning Implementation Responsibility and Schedules  
Plan Maintenance and Monitoring of Plan Implementation  
Plan Updating, Review and Approval  
Status of Plan Promulgation  
Implementation through Existing Plans and Programs  
Continued Public Involvement  
The Next Planning Cycles  
Modification to Other Policies Plans, and Programs

## Appendices

<b>Appendix A</b>	The Task Force Bylaws
<b>Appendix B</b>	Documentation of the Planning Process
<b>Appendix C</b>	Task Force Operating Procedures
<b>Appendix D</b>	Evaluation of Mitigation Policies
<b>Appendix E</b>	Funding Sources by Category
